## PROJECTS

### TECH EUPHORIA 2K23

#### Front End :

HTML , CSS , Back End : PHP , Database : Xampp.

#### Project Description :

Developed website for the college fest "TECH-EUPHORIA 2K23".The website is designed for registration for participating in the department and college level events and checking for the fest updates.We developed an engaging website for our college fest , TECH EUPHORIA, that boasts a rich array of features to enhance the fest experience.

### NO PLASTIC

#### Front End :

HTML , CSS , Back End : PHP , Database : Xampp.

#### Project Description :

The project is based on collecting the information from municipal officers and checking where the plastic usage is more by using machine learning.This project induces an escort system to find in which places plastic usage is more. In this project Deputation department employees give testimony about plastic usage by people in multifarious places.

### Sri Vasavi Blood Bank

#### Front End :

HTML,CSS , Back End : django

#### Project Description :

An online blood bank repository that lets our college students know the availability of various blood groups. Wehave developed this repository in the idea of our NSS team.It is intended to help people in need of blood of any blood group.
